Note: DO NOT GROUND the COM terminal. This is the common terminal and not ground or neutral. Please see the wiring instructions for the switches.

Features:
- UR (UL Recognized) and rated for NEMA 1 (field installed by others)
- An optional motor control panel or controller is required when a wired magnetic door limit switch is used.
  - 99-118 requires a RIB Controller and is rated for 3/4 HP
- Wired switches have single pole terminal (1P) normally closed (NC) and normally opened (NO) contact.
- Turns the air curtain on when the door opens and off when the door closes
- Used when automatic control of an air curtain(s) is required
- Easy to install and switches are lightweight
- Ideal Applications for each switch:
  - 99-018 when neat and trim finish is desired for commercial applications
  - 99-118 switch used where door sees lower traffic, wireless
  - 99-124 used when roll-up doors with fork lift traffic
  - 99-125 used where wiring and switches need to be concealed
  - 99-275 used when wiring and switches need to be concealed
- Requires less than 1/8" distance between magnets to energize and de-energize the air curtain

Options and Accessories: (see Accessories Brochure)
- RIB controllers
- Motor Control Panels
