

MARS STOPS THE INCURSION OF FLYING PESTS & THE DISEASES THEY TRANSMIT

FLYING PESTS & THE PATHOGENS THEY CARRY ARE UNSANITARY & PERSISTANT ANNOYANCES

- Refuse areas are high attractant for flying pests
- Environments that store, prepare, cook and serve food need protection from pathogens introduced by flying pests
- Health department mandates flying pest containment
- Door openings invite dust, pests, debris that diminish reputation and diminish your clients and customers experience
- Lavatory odors attract pests and reduce your sanitation efforts

FLYING PESTS AND THE PATHOGENS THEY TRANSPORT ARE NO MATCH FOR MARS

- **Pest Control** | When pest control is mandated by health departments, Mars creates the protection that meets the requirements
- **Guest Comfort** | Clients & staff are more comfortable in pest-free spaces
- **Pathogen Protection** | The pathogens and dirt that flying pests carry are eliminated with Mars protection
- **Flying Insect Control** | Flying insects are repelled and kept outside with Mars at every opening
- **UV Odor Control** | Specialized units offer UV light protection to eliminate, not cover up odors
- **Pesticide-Free** | Provide a pesticide-free alternative to flying insect control

Refuse area aromas can be eliminated with Mars UVC™ on duty

Flying insects no match for Mars barrier-free protection

Protect your reputation and enhance cleanliness with Mars standard units or Mars HEPAC® and Mars UVC™ highly sanitizing units

Patio dining and profits extended with an invisible, barrier-free protection

Chemical free pest control supports sustainability efforts and organic emphasis

Make Mars part of your Integrated Pest Management (IPM) plan and eliminate obstructions or chemical additions to control pests

atmosphere is everything
