

# MARS AIR CURTAINS = LESS COSTLY COLD STORAGE

## CHALLENGES IN COLD STORAGE UNIT OPERATION

- **High Spend** Sky-high utility bills
- **Compromised Equipment** Icing & condensation diminish unit performance
- **Safety Hazards** Slippery floors = safety hazards, worker slip and falls
- **Compromised Product** Temperature fluctuations that compromise products
- **Poor Solutions** Cloudy & dirty plastic strips don't protect
- **Early Equipment Failure** Evaporators and condensers fail early from heavy loads
- **Debris & Flying Pests** Debris and flying pests are threat from open doors = contaminate products

High-speed doors in cold storage realize better temperature-loss protection when amplified with Mars protective barrier

## LESS COSTLY OPERATIONS AND BETTER TEMPERATURE CONTROL

- **Eliminate Icing & Condensation** Mars' ability to reduce icing and condensation protects goods and extends the life of the equipment while contributing to controlling pathogens, fungus and mold.
- **Extend Lifespan of Evaporators & Condensers** Doing its part to maintain interior temperatures, Mars reduces the burden on evaporators and condensers to extend their life and minimize service calls.
- **Eliminate Hazardous Slippery Floors** Dripping moisture and hazardous slippery floors are eliminated with the powerful air stream of Mars protection.
- **Reduce Utility Bills** Lower the utility spend with the invisible barrier protection of Mars that works to keep costly treated air inside the unit even when loading requires wide open doors.
- **Eliminate Plastic Strip Curtains** Ineffective, dirty, cloudy strip curtains can be relegated to the past with an today's effective Mars air curtain solution.
- **Protect Product Integrity** Shelf life extends and product quality never diminishes when temperature fluctuations are eliminated with the Mars protective shield.
- **Shut Out Flying Pests and Debris** Keep flying pests and debris out and conditioned air in.

# THE ULTIMATE PROTECTION FOR COLD STORAGE OPERATIONS

**ELIMINATE ICING & CONDENSATION** Mars' ability to reduce icing and condensation protects goods and extends the life of the equipment while contributing to controlling pathogens, fungus and mold.

**ELIMINATE HAZARDOUS SLIPPERY FLOORS** Dripping moisture and hazardous slippery floors are eliminated with the powerful air stream of Mars protection.

**EXTEND LIFESPAN OF EVAPORATORS & CONDENSERS** Doing its part to maintain interior temperatures, Mars reduces the burden on evaporators and condensers to extend their life and minimize service calls.

**ELIMINATE PLASTIC STRIP CURTAINS** Ineffective, dirty, cloudy strip curtains can be relegated to the past with an today's effective Mars air curtain solution.

**PROTECT PRODUCT INTEGRITY** Shelf life extends and product quality never diminishes when temperature fluctuations are eliminated with the Mars protective shield.

**REDUCE UTILITY BILLS** Lower the utility spend with the invisible barrier protection of Mars that works to keep costly treated air inside the unit even when loading requires wide open doors.

**SHUT OUT FLYING PESTS AND DEBRIS** Keep flying pests and debris out and conditioned air in.

atmosphere is everything

For over 50 years, Mars Air Systems has been the international leader with air curtains. Manufacturing products of the highest reliability that can fit a range of applications and sizes; from drive-thru windows to receiving doors to outdoor patios, we help you comply with federal and state regulations while we lower energy costs and protect climatized air.
