

MARS STOPS THE INCURSION OF FLYING PESTS & THE DISEASES THEY TRANSMIT

FLYING PESTS & THE PATHOGENS THEY CARRY ARE UNSANITARY & PERSISTANT ANNOYANCES

- Refuse areas are high attractant for flying pests
- Environments that store, prepare, cook and serve food need protection from pathogens introduced by flying pests
- Health department mandates flying pest containment
- Door openings invite dust, pests, debris that diminish reputation and diminish your clients and customers experience
- Lavatory odors attract pests and reduce your sanitation efforts

FLYING PESTS AND THE PATHOGENS THEY TRANSPORT ARE NO MATCH FOR MARS

- **Pest Control** | When pest control is mandated by health departments, Mars creates the protection that meets the requirements
- **Guest Comfort** | Clients & staff are more comfortable in pest-free spaces
- **Pathogen Protection** | The pathogens and dirt that flying pests carry are eliminated with Mars protection
- **Flying Insect Control** | Flying insects are repelled and kept outside with Mars at every opening
- **UV Odor Control** | Specialized units offer UV light protection to eliminate, not cover up odors
- **Pesticide-Free** | Provide a pesticide-free alternative to flying insect control
